Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

1. MANAGEMENT'S DISCUSSION AND ANALYSIS

The following discussion and analysis is management's assessment of the results and financial condition of Innocan Pharma Corporation (the "**Company**").

The following information should be read in conjunction with the notes to the Company's unaudited condensed consolidated financial statements for the period ended September 30, 2023, and the Company's audited consolidated financial statements and accompanying notes for the year ended December 31, 2022.

The date of this management's discussion and analysis ("**MD&A**") is November 29, 2023. The Company's amounts in this MD&A have been prepared in accordance with International Financial Reporting Standards ("**IFRS**"). All dollar amounts are stated in United States dollars ("**US\$**") unless otherwise indicated (for reference, "**CAD**" means Canadian dollars).

Statements in this report that are not historical facts are forward-looking statements involving known and unknown risks and uncertainties, which could cause actual results to vary considerably from these statements. Readers are cautioned not to put undue reliance on forward-looking statements.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING INFORMATION

This MD&A contains forward-looking information within the meaning of applicable Canadian securities legislation ("**forward-looking information**"). Such forward-looking information involves known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date the statements were made.

In some cases, these forward-looking statements can be identified by words or phrases such as "may", "believes", "expects", "will", "intends", "projects", "anticipates", "estimates", "continues", "plans", "aim", "seek" or the negative of these terms, or other similar expressions intended to identify forward-looking statements. The Company has based these forward-looking statements on current expectations and projections about future events and financial trends that they believe may affect the Company's financial condition, results of operations, business strategy and financial needs.

Forward-looking information contained herein is given as of the date of this MD&A and the Company disclaims any obligation to update any forward-looking information, whether as a result of new information, future events or results, except as may be required by applicable securities laws. There can be no assurance that forward-looking information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking information. For a description of material factors that could cause the Company's actual results to differ materially from the forward-looking statements in this MD&A, please see the section titled "Risks and Uncertainties" herein.

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

2. DESCRIPTION OF BUSINESS

Company Overview

Innocan Pharma Corporation was incorporated under the *Canada Business Corporations Act* on May 31, 2018. The Company's registered office is 1015, 926 – 5 Avenue SW Calgary, Canada and its corporate website is www.innocanpharma.com. The Company is publicly listed on the Canadian Securities Exchange trading under the symbol INNO, and is quoted in the United States on the OTCQB venture market under the symbol INNPF, and is listed for trading in Germany on the Frankfurt stock exchange under the symbol IP4. The Company is the parent company of Innocan Pharma Ltd. ("**Innocan**").

Innocan is a pharmaceutical technology company that focuses on the development of several drug delivery platforms, combining cannabinoids, especially cannabidiol ("**CBD**"), with other pharmaceutical ingredients as well as the development and sale of CBD-integrated pharmaceuticals and topical products. Innocan is at a pre-clinical stage and is expected to conduct activities mainly in the United States (US), Canadian and European (EU) markets. Innocan's operations and research and development activities are based in Israel.

In October 2019, Innocan announced its plans to enter the CBD beauty market and to manufacture CBD cosmetic products. Innocan intends to sell its CBD cosmetic products primarily in the US, Canadian and European markets. For more information on Innocan's product lines, please see details on SHIR | Beauty & Science (shirbeauty.com) and its corporate website at www.innocanpharma.com. The websites are not incorporated into this MD&A and do not form part of this MD&A.

On May 5, 2021, Innocan Pharma UK Ltd. ("Innocan UK") was established, as a management and financial services supplier of Innocan in the European market, regarding the sales of its topical products. Innocan holds 100% of Innocan UK's shares. As of September 30, 2023, Innocan UK had not commenced operation.

On May 26, 2021, Innocan entered into a founder's agreement with Brandzon Co. Ltd. to establish a joint venture by the name of B.I. Sky Global Ltd. ("**Sky Global**") that focuses on the development of beauty microbrands for online platforms such as Amazon, and other e-commerce and online marketplaces.

In bringing together a unique combination of experts in online marketplaces, e-commerce, logistics, operations and finance, Sky Global is focusing on advancing online sales for microbrands.

References throughout to "Innocan" and the "Company" refer generally to the collective activity and operations of both entities, in aggregate. Innocan consolidates ,Innocan UK and Sky Global activity and operations.

Description of the Company's Principal Businesses and Operations

Company's Activity Under Research Agreements

On February 22, 2023, the Company reported another clinical success in its canine (dogs) "Compassionate Care Trial", resulting in improved walking ability and significant decrease in pain in participating canines. "Lady", an 11-year-old female dog was presented to Innocan labs suffering from severe autoimmune mediated polyarthritis. Lady was treated with glycoflex, steroids and hydrotherapy, but still suffered pain and had difficulty walking. Lady was administered the

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

Company's liposomal CBD injection and experienced significant improvement, which lasted more than five weeks, indicating the long-acting nature of the liposomal CBD formulation.

On March 17, 2023, Innocan announced the launch of its licensing and commercialization strategy work with respect to cannabinoid therapy in the veterinary field.

On May 8, 2023, Innocan announced the successful treatment of a 4-year-old male goat, experiencing neurological deficits and scoliosis, resulting in hind-limb paralysis and fore-limb deformity, with a liposomal-CBD injection in a pre-clinical trial. The results were improved mobility for a 4-week period.

On August 29, 2023 Innocan announced the results of a clinical study regarding the pain-relieving effects and safety of the Company's subcutaneous liposomal CBD (Innocan's LPT platform) for dogs with osteoarthritis, published in the Frontiers in Veterinary Science Journal, under the research topic "Use of Cannabis Derivatives in Veterinary Medicine" (the "Study"). The Study highlights that CBD plasma levels were detected for six weeks following a single subcutaneous dose of liposomal-CBD, causing minimal side effects and effectively decreasing pain, leading to improved well-being in affected dogs. In the Study, six dogs with naturally-occurring osteoarthritis, unresponsive to conventional medications, were treated with a single injection of five mg/kg liposomal-CBD (in addition to their routine medications). The subsequent observations spanned six weeks and included measuring CBD plasma concentrations, blood work, collar activity data, and evaluations of well-being and pain. The results were encouraging; dogs exhibited a substantial drop in pain levels and an uptick in activity.

The table below provides a description of each of Innocan's major projects. More stages are required in order to receive full regulatory approval. Forward-looking information is based on estimations at the time of this report. Actual results may vary.

Milestones	Milestone status	Expenditures Incurred to Date (September 2023) (US\$)	Estimated Costs to Achieve Milestone (US\$)	Expected Time Period

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

Milestones	Milestone status	Expenditures Incurred to Date (September 2023) (US\$)	Estimated Costs to Achieve Milestone (US\$)	Expected Time Period
Yissum Research		3,836,000	217,000	The Company and Yissum entered negotiations for a new research and license agreement for the next phase of the research. The Company is intending to sign a sub-licensing agreement before reaching Phase II.
<u>Total Pre-Clinical (including safety)</u>		3,836,000	717,000	
Veterinary application clinical use study		-	1,200,000	Q3 23- Q3 24
Project: CBD - Topicals (the "Topicals Project")				
	Production & registration submission done	1,327,000	Budget depends on many parameters, such as nature of distribution agreements to be signed, COVID-19 effect on the market, regulatory changes.	On-Going
	Marketing & brand recognition	893,000	207,000	On-Going
	Efficacy studies	53,000	77,000	On-Going

In general, and as is the case for each of the CLX Project and the LPT Project, in order to develop a new treatment, drug or medical procedure in a clinical research and development context, the following phases are required:

Preclinical: this phase involves the testing in non-human subjects to gather information regarding efficacy, toxicity and pharmacokinetic data; particularly oral bioavailability and half-life of the given drug or treatment.

Phase I: this phase introduces "dose-ranging" on healthy volunteers or genuine patients (this depends on the indication, but could also be considered Phase I/II); the purpose of this phase is to evaluate safety.

Phase II: this phase involves further testing of the given drug or treatment on participants to assess efficacy and monitor for any side effects.

Phase III: this phase expands testing of the given drug or treatment on participants in larger numbers to similarly assess for efficacy, effectiveness and safety.

Phase IV: Post marketing surveillance in public.

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

With respect to each of the CLX Project and the LPT Project, the Company is in the Preclinical phase of the research and development. In order to commercialize the CLX Project and LPT Project, each of the above-noted phases will need to be completed. The timeline for completion of the CLX Project and LPT Project is unknown at this time.

Regarding the known costs of the CLX Project, LPT Project and Topicals Project, the Company projects the following, as related to its commitments to fund research and development over the next five years:

Business activity	Term of signed agreement/commitment	Expected US\$ commitment for the term	Two-year expected budget^(1,3)	Expected five year status⁽²⁾
LPT	Yissum (Hebrew University of Jerusalem) – current until Q4 23	1,750,000	5,600,000	At least one licensing agreement, clinical stage
CLX	Ramot (Tel Aviv University) – current until Q4 23	900,000	4,400,000	At least one licensing agreement, clinical stage.
Topicals	No signed agreements carrying any financial commitment	N/A	see comment	Budget depends on many parameters, such as nature of distribution agreements to be signed, COVID-19 effect on the market, regulatory changes.

Notes:

(1) This budget is a forward-looking budget. Actual budget may vary, as the project develops.

(2) The status of the project depends on actual achievements of the research. Actual results may vary, based on the research and development success and the Company's ability to translate those achievements into licensing agreements and/or sales.

(3) Amounts may vary based on signing of future licensing agreements.

Sales, Marketing and Business Development

The expenses addressed below are to be incurred to broadly develop general brand recognition of the Company and its products in a number of jurisdictions (principally, the US and EU). These costs also relate to the development of relationships with potential third party distributors, licensees and wholesalers at the production and distribution end of the product chain, developing relationships with third parties potentially utilizing the Company's services, and promoting product awareness and product attributes with medical, pharmaceutical and other healthcare individuals and enterprises, as well as consumers.

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

Business development	~150,000	2023 and 2024
Total:	\$2,437,500	

Company IP

On March 12, 2023, the Company announced that the United States Patent and Trademark Office (“USPTO”) has issued a Notice of Allowance for Innocan’s patent application number 16/968,627 with claims related to the Company’s combined cannabis and magnesium topical pain-relief technology (the “Patent”). This is the first fully granted patent of Innocan in the United States. The Patent discloses and claims breakthrough magnesium and cannabis-based technology that is administered topically. The technology is designed to systemically relieve pain and/or itching, and is administered via spray, roll-on or lotion. The Company intends to file further patent applications with the USPTO, as well with other patent offices worldwide, in order to further establish its novel cannabis-based IP portfolio.

On April 3, 2023, the Company announced the filing of a joint application with Ramot at Tel Aviv University Ltd. (“Ramot”) to the World Intellectual Property Organization. The application pertains to the development of a novel platform for loading Cannabinoids on Exosomes.

On June 12, 2023, the Company announced the filing of its most recent patent application to the USPTO, which aligns with the Company’s ongoing strategy to expand the breadth of its distinctive combined Cannabis and Magnesium topical pain-relief technology. This latest continuation patent application encapsulates additional aspects of the Company’s combined Magnesium and Cannabis-based solution, explicitly crafted for pain and itching alleviation.

Other Businesses and Operations

On February 16, 2023, the Company closed a non-brokered private placement offering of 1,982,000 units of Innocan at a price of CAD 0.25 per Unit for aggregate gross proceeds of CAD 495,500.

On June 22, 2023, the Company announced its participation in the 15th International Congress organized by the Executive Committee of the European Association of Veterinary Pharmacology and Toxicology, in Bruges, Belgium from July 2 to July 5, 2023.

On August 3, 2023, the Company closed a non-brokered private placement offering of 8,409,735

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

units of Innocan at a price of CAD 0.23 per Unit for aggregate gross proceeds of CAD 1,934,239. Each unit consists of: (i) one (1) common share in the capital of the Company; (ii) one-half of one (1) Class A common share purchase warrant (each whole Class A common share purchase warrant, a "Class A Warrant"); and (iii) one-half of one (1) Class B common share purchase warrant (each whole Class B common share purchase warrant, a "Class B Warrant"). Each Class A Warrant will entitle the holder thereof to purchase one common share in the capital of the Company at a price of CAD 0.29 for a period of three (3) years from the date of issuance. Each Class B Warrant will entitle the holder thereof to purchase one common share in the capital of the Company at a price of CAD 0.40 for a period of five (5) years from the date of issuance.

On August 15, 2023, the Company announced the results of a controlled efficacy trial of its diabetic foot relief cream. The trial results affirm that Innocan's product (a proprietary formulation of cannabinoids, vasoconstriction stimulators, and potent moisturizers) is highly effective in alleviating foot dryness and decreasing the risk of skin cracking, a precursor to bruising and subsequent diabetic complications in individuals with diabetes.

On September 5, 2023, the Company announced the results of a controlled efficacy test regarding its hair care cream. The trial demonstrated enhanced hair growth in male and female participants in a 14-day period.

On September 15, 2023, the Company announced the appointment of Dr. Joseph V. Pergolizzi, Jr., M.D. to its Scientific Advisory Board. Dr. Pergolizzi, a distinguished expert in the field of pain management and critical care medicine, will be instrumental in the Company's planned FDA filing for human medications. Dr. Pergolizzi is a Senior Partner at Naples Anesthesia and Pain Associates and serves as the Chief Operating Officer at NEMA Research Inc.

On September 21, 2023, the Company announced that it has entered into an agreement with Research Capital Corporation as the sole agent and sole bookrunner (the "Agent") on a "best efforts" agency basis in connection with a marketed private placement offering (the "Offering") of units of the Company at a price of CAD 0.30 per Unit for aggregate gross proceeds of up to CAD 3,000,000. Each unit shall be comprised of one common share of the Company and one common share purchase warrant of the Company. Each warrant shall entitle the holder thereof to purchase one common share in the capital of the Company at an exercise price of CAD 0.36 for a period of 36 months from the date of closing.

Significant Financial Developments during the Period

On December 5, 2022, Innocan entered a third amendment (the "Third Amendment") to the research and license agreement with Yissum. As part of the Third Amendment, Innocan agreed to finance additional research with the aim of meeting the FDA guidance on Liposome drug-products in a total amount of approximately US\$278,000, over a period of three months (November 2022 to January 2023). The full amount of US\$278,000 was paid in December 2022. On February 20, 2023, Innocan entered into the fourth amendment to the research and license agreement with Yissum Research Development Company of the Hebrew University of Jerusalem Ltd. ("Yissum") (the "Fourth Amendment"). As part of the Fourth Amendment, Innocan agreed to finance additional research with the aim of meeting the FDA guidance on liposome drug products in a total amount of approximately \$293,000 over a period of three months (February 2023 to April 2023).

On September 13, 2023 Innocan entered a fifth amendment (the "Fifth Amendment") to the research and license agreement with Yissum for an additional amount of approximately \$183,000 over

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

a period of three months (July 2023-September 2023). The total expense due to research activity by Yissum incurred during nine and three months period ended September 30, 2023 amounted to US\$569,000 and US\$183,000 accordingly. Yissum grants to the company an exclusive, worldwide, royalty-bearing license, under Yissum's rights to make, use, offer to sell, sell and import products in the field of this research. Negotiations are ongoing between the Company and Yissum regarding next steps.

On December 6, 2021, Innocan entered into a license and research agreement with Ramot at Tel Aviv University Ltd., under which Innocan agreed to finance additional research in a total amount of approximately US\$1,180,000, over a period of 21 months, in four installments. Since December 2021, Innocan had made payment in the amount of US\$290,000.

On April 3, 2023, the Company entered into a second amendment to the License and Research Funding Agreement with Ramot, which included an agreement to terminate the research under the agreement. In light of the termination of the research: (i) none of the second instalment (US\$309,150), the Third Instalment (US\$270,000) nor the fourth instalment (US\$328,050) are due to be paid; and (ii) the Tel Aviv University team is no longer required to perform the remainder of the research. Ramot has granted to the Company an exclusive, worldwide, royalty-bearing license, under Ramot's rights to make, use, offer to sell, sell and import products in the field of this research.

On March 23, 2023, the Company announced the successful results of a controlled efficacy test (the “**Trial**”) regarding its vaginal derma product (the “**Product**”). The results of the Trial demonstrate that Company's Product, which contains cannabinoids, phytoestrogens, hyaluronic acid, and probiotics, effectively reduced the symptoms, and improved overall vaginal health.

Notes:

⁽¹⁾ Reclassified immaterial amounts from cost of revenues to selling, marketing and distribution expenses of: US\$182,000 and US\$314,000 for the three months ended June 30, 2022 and September 30, 2022, respectively.

⁽²⁾ Reclassified immaterial amounts from general and administrative to cost of revenues of: US\$7,000, US\$9,000 and US\$38,000 for the three months ended March 31, 2022, June 30, 2022 and September 30, 2022, respectively.

Three and nine Months Period Ended September 30, 2023, compared to the Three and Nine Months Period Ended September 30, 2022***Revenues***

For the nine months period ended September 30, 2023, revenues amounted to US\$8,764,000 compared to US\$1,424,000 for the nine months period ended September 30, 2022. The increase in

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

revenues of US\$7,340,000 is mainly attributed to the increase in revenues from on-line sales platforms of a subsidiary company.

For the three months period ended September 30, 2023, revenues amounted to US\$4,083,000 compared to US\$749,000 for the three months period ended September 30, 2022. The increase in revenues of US\$3,334,000 was also attributed to the increase in revenue from on-line sales platforms.

Selling, Marketing and Distribution Expenses

For the nine months period ended September 30, 2023, selling, marketing and distribution expenses amounted to US\$6,961,000 (US\$75,000 is share-based compensation expenses) compared to US\$2,334,000 (US\$151,000 is share-based compensation expenses) for the nine months period ended June 30, 2022. The main factors contributing to the increase of US\$4,627,000 included:

1. An increase of US\$5,108,000 was attributed to Amazon advertising and related fees. These expenses are related to revenue from the operational subsidiary of Sky Global.
2. A decrease of US\$76,000 was attributed to a decrease in share-based compensation expenses as a result of fewer options that were vesting during the nine months period ended September 30, 2023 (to selling and marketing service providers and employees of the Company) compared to the nine months period ended September 30, 2022. This expense is a non-cash item and does not influence the cash flow of the Company nor results in negative cash flow.
3. A decrease of US\$242,000 was attributed to a decrease in service providers who provided services during the nine months ended September 30, 2022 but were reduced during the nine month period ending September 30, 2023.
4. A decrease of US\$106,000 was attributed to a decrease in salary and related expenses as a result of the reduction in the number of employees and salary expenses.

For the three months period ended September 30, 2023, selling, marketing and distribution expenses amounted to US\$3,358,000 (US\$ 42,000 is share-based compensation expenses) compared to US\$866,000 (\$43,000 is share-based compensation expenses) for the three months period ended September 30, 2022. Mainly factors contributing to the increase of US\$2,492,000 included:

1. An increase of US\$2,381,000 was attributed to Amazon advertising and related fees. These expenses are related to revenue from the operations of the subsidiary Sky Global.
2. An increase of US\$141,000 was attributed to service providers due to an increase in investor relations' services during the three months ended September 30, 2023 of.
3. A decrease of US\$23,000 was attributed to a decrease in salary and related expenses as a result of the reduction in the number of employees and salary expenses.

Research and Development Expenses

For the nine months period ended September 30, 2023, research and development expenses amounted to US\$1,292,000 compared to US\$1,169,000 for the nine months period ended

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

September 30, 2022. The increase of US\$123,000, is mainly attributed to:

1. The increase in research and development expenses of US\$161,000 related to the research and license agreement with Yisum. The Fifth Amendment was signed during September 2023 for additional research. The Company is currently in negotiations with Yisum regarding next steps. Further, an additional US\$60,000 for service providers relating to the research also contributed to the increase.
2. A decrease in share based compensation of US\$101,000 due to a result of fewer options that vested to research and development employees during the nine months period ended September 30, 2023.

For the three months period ended September 30, 2023, research and development expenses amounted to US\$431,000 compared to US\$232,000 for the three months period ended September 30, 2022. The increase of US\$199,000, is mainly attributed to:

1. An increase in research expenses of US\$183,000 related to the research and license agreement with Yisum. The Fifth Amendment was signed during September 2023 for additional research. The Company is currently in negotiations with Yisum regarding next steps. And an increase of additional US\$40,000 for service providers which relates to the research.

General and Administrative Expenses

For the nine months period ended September 30, 2023, general and administrative expenses amounted to US\$2,345,000 (US\$ 600,000 is share-based compensation expenses) as compared to US\$2,360,000 (US\$501,000 is share-based compensation expenses) for the nine months period ended September 30, 2022.

Share-based compensation expenses, which is a non-cash item and does not affect the cash flows of the Company or result in any negative cash flow, increased by US\$99,000 as a result of new options that were granted and issuance of common shares to a service provider during the nine months period ended September 30, 2023, compared to the nine months period ended September 30, 2022.

For the three months period ended September 30, 2023, general and administrative expense amounted to US\$1,081,000 (US\$484,000 is share-based compensation expense) as compared to US\$677,000 (US\$89,000 is share-based compensation expense) for the three months period ended September 30, 2022. The increase of US\$404,000 in general and administrative expenses compared to the three months period ended September 30, 2022, is attributed mainly to the following changes:

1. Share-based compensation expenses, which is a non-cash item and does not affect the cash flows of the Company or result in any negative cash flow, increased by US\$395,000 mainly as a result of new options that were granted and issuance of common shares to a service provider during the three months period ended September 30, 2023, compared to the three months period ended September 30, 2022.

Innscan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

2. Professional services expenses increased by US\$58,000 in the three months period ended September 30, 2023, compared to the three months period ended September 30, 2022, mainly due to increase in activity of Sky Global during the three months ended 2023.
3. The decrease of US\$63,000 is mainly attributed to an decrease in other fees and insurance expenses during the three months period ended September 30, 2023, compared to the three months period ended September 30, 2022.

Finance Income (expense)

For the nine months period ended September 30, 2023, net finance expense amounted to US\$543,000 as compared to a net finance income of US\$2,138,000 for the nine months period ended September 30, 2022. The change in finance expense and income, was mainly as a result of changes in fair value of warrants outstanding during the nine months period ended September 30, 2023, compared with the changes in fair value of warrants outstanding during the nine months period ended September 30, 2022. This change in fair value of warrants outstanding is mainly affected by the share price of the Company (the decrease in the share price during the nine months period ended September 30, 2022, was significant compared to the nine months period ended September 30, 2023) and the amount of warrants outstanding. The number of warrants outstanding increased from September 30, 2022, to September 30, 2023, as a result of granting of warrants. The decrease in net finance income or the increase in the net finance expenses resulting from changes in fair value, is a non-cash item, and does not affect the cash flows of the Company or result in any negative cash flow.

For the three months period ended September 30, 2023, net finance expense amounted to US\$621,000 as compared to a net finance income of US\$898,000 for the three months period ended September 30, 2022. The change in finance income was mainly as a result of changes in fair value of warrants outstanding during the three months period ended September 30, 2023, compared with the changes in fair value of warrants outstanding during the three months period ended September 30, 2022, and to changes in currency exchange.

Further details on changes in expenses for the previous year presented in the table above can be found at relevant Management Discussion and Analysis documents and Management Information Circulars, that have been filed with Canadian securities regulatory authorities and are available at www.sedarplus.ca.

3. LIQUIDITY AND CAPITAL RESOURCES

On February 16, 2023 and August 3, 2023, the Company completed a private placement, the proceeds of which are being used to fund the research, development and commercialization of the Company's technology and marketing activities (the "February 2023 Private Placement" and the "August 2023 Private Placement", respectively). Should the Company be unable to continue to obtain financing and or commence earning revenue to sustain a commercial operation, the Company may be unable to continue as a going concern.

Since inception, the Company has generated an amount of revenue lower than its operational expenses and expects to continue to finance itself through raising adequate funds in the foreseeable future. The Company has incurred an accumulated deficit of US\$32,191,000 since inception (much of this deficit was a result of the changes in finance expense, which is a non-cash item, and does not affect the cash flows of the Company or resulting in any negative cash flow). These events or

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

conditions indicate that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern.

As of September 30, 2023, the Company had working capital of US\$6,053,000, compared with US\$6,451,000 as of December 31, 2022, which consisted of current assets of cash and cash equivalents, trade receivables, other accounts receivable and inventory, and trade accounts payable, other accounts payable. The working capital above is a non-GAAP measure since it does not include the balance of the warrants under current liabilities. The warrants balance was not included since it has no effect on the future cash flow of the Company, and not current or future payments are required to be made by the Company.

As of the date of this MD&A, the Company anticipates raising additional funds in the future to support additional research and development costs and to have sufficient resources to support its operations, including the payment of current and non-current liabilities, as they become due.

Nine and Three Months Period Ended September 30, 2023, compared to the Nine and Three Months Period Ended September 30, 2022

During the nine months period ended September 30, 2023, the Company's overall position of cash and cash equivalents decreased by US\$923,000, compared to an decrease of US\$4,632,000 in the nine months period ended September 30, 2022.

This decrease in cash and cash equivalents can be mainly attributed to the following:

- The Company's net cash used in operating activities during the nine months period ended September 30, 2023 amounted to US\$2,593,000 as compared to US\$4,703,000 for the nine months period ended September 30, 2022. The decrease in net cash used in operating activities in the nine months period ended September 30, 2023 is mainly attributed to a decrease in spending on business development consultant services and higher revenues comes from the subsidiary's activity;
- The Company's net cash provided by financing activities during the nine months period ended September 30, 2023 amounted to US\$1,799,000 as compared to net cash provided of US\$127,000 for the nine months period ended September 30, 2022. This increase in cash provided by financing activities during the nine months period ended September 30, 2023 is attributed to cash received in February 2023 from the February 2023 Private Placement and from cash received in August 2023 from the August 2023 Private Placement.
- Exchange rate fluctuations caused the Company's overall position of cash and cash equivalents to decrease by US\$54,000.

4. TRANSACTIONS WITH RELATED PARTIES

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making operating and financial decisions. This would include the Company's senior management, who are considered to be key management personnel by the Company.

Parties are also related if they are subject to common control or significant influence. Related parties may be individuals or corporate entities. A transaction is considered to be a related party transaction when there is a transfer of resources or obligations between related parties.

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

The following table sets forth information concerning the total compensation paid to the named executive officers (the “**Named Executive Officers**”) of the Company and related corporate entity for the nine months period ended September 30, 2023 and September 30, 2022.

(US\$ in thousands)	Nine months period ended September 30,	
	<u>2023</u>	<u>2022</u>
Management compensation	458	291
Share-based compensation	175	162
Services fees	41	177

The Company has transactions with key management personnel.

	As of September 30, 2023 (US\$ in thousands)	As of December 31, 2022 (US\$ in thousands)
Balances owing to the CEO	44	38
Balances owing to the VP Business development	-	-
Balances owing to the Board of directors Chairman	-	-
Balances owing to the CFO	5	-
Balances owing to the COO	11	4

5. FINANCIAL INSTRUMENTS AND FINANCIAL RISK EXPOSURES

The Company's financial instruments consist of cash and cash equivalents and, unless otherwise noted, it is management's opinion that the Company is not exposed to significant interest or credit risk arising from these financial instruments. The fair value of these financial instruments approximates their carrying values, unless otherwise noted.

Management understands that the Company is exposed to financial risk arising from fluctuations in foreign exchange rates and the degree of volatility of these rates as its operations are located in Israel, and the Company's functional and presentation currency is the US\$. The Company does not use derivative instruments to reduce its exposure to foreign currency risk.

The Company is exposed in varying degrees to a variety of financial instrument related risks. The board of directors of the Company (the “**Board of Directors**”) approves and monitors the risk management process. The overall objectives of the Board of Directors are to set policies that seek to reduce risk as far as possible without unduly affecting the Company's competitiveness and flexibility.

The type of risk exposure and the way in which such exposure is managed is as follows:

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

- **Credit Risk** – The Company has no significant concentration of credit risk arising from operations. Management believes that the credit risk concentration with respect to financial instruments is remote.
- **Liquidity Risk** – The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities as they come due by raising sufficient funds. As of September 30, 2023, the Company had a US\$6,053,000 working capital balance (December 31, 2022 – US\$6,451,000, see comment under "liquidity and capital resources" section above), and the Company has little exposure to liquidity risk, as it will balance expenditures with available working capital.
- **Market Risk** – Competitive Conditions – The pharmaceutical industry is characterized by extensive research efforts, rapid technological change and intense competition. Competition can be expected to increase as technological advances are made and commercial applications for pharmaceutical products increase. Competition in the pharmaceutical industry is based primarily on the following: product performance, efficacy, safety, ease of use and adaptability to various modes of administration, patient compliance, price, acceptance by physicians, marketing and distribution.
 - The availability of patent protection in the pharmaceutical market, including the USA, the European Union, Canada and other jurisdictions of commercial interest and the ability to obtain governmental approval for testing, manufacturing and marketing are also important factors. The Company faces competing forces in each of its markets, however, owing to their sheer size, each market provides ample opportunity for a new player offering novel solutions to consumers of said market, to carve out a foothold, which it can use as a springboard for capturing additional market share and for extending into other related markets.
- **Interest Rate Risk** – The Company has no interest-bearing debt. The Company's current policy is to invest excess cash in investment-grade short-term deposit certificates issued by its banking institutions. The Company periodically monitors its cash activity and is satisfied with the credit ratings of its banks.
- **Foreign Currency Risk** – The Company is exposed to foreign exchange risk as its operations are conducted primarily in US dollars.
- **Fair Values** – The carrying values of other receivables approximate their fair values due to their short terms to maturity. The cash is valued using quoted market prices in active markets.

6. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of the financial statements to which this MD&A applies requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. The financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the financial statements and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and also in future periods when the revision affects both current and future periods.

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

Below is a list of the critical accounting estimates and judgments applied in this MD&A which may have a significant effect on the figures recognized in the financial statements.

Derivative Fair Value Measurement

1. In October 2021, the Company issued 9,679,000 Common Shares and Common Warrants as part of a private placement. The Common Warrants were recorded as a derivative financial liability and will be re-measured each reporting date, with changes in fair value recognized in finance expense (income), net. The derivative financial liability as at September 30, 2023 amounted to US\$420,000. The fair value of the derivatives was obtained using a structural approach. This approach is based on the Black Scholes (1973) and Merton (1974) models (hereafter: Black Scholes Merton, or BSM), which imply that all corporate securities may be analyzed as a contingent claim on the Company assets, and therefore, their value may be modeled as financial derivative contracts.
2. In connection with the February 2023 Private Placement, the Company issued 1,982,000 Units to investors. Each Unit consists of one-half of one (1) Class A common share purchase warrant (each whole Class A common share purchase warrant, a "Class A Warrant"); and (iii) one-half of one (1) Class B common share purchase warrant (each whole Class B common share purchase warrant, a "Class B Warrant") (collectively each whole Class A Warrant and each whole Class B Warrant, a "Warrant"). The Warrants were recorded as a derivative financial liability and will be re-measured each reporting date. The derivative financial liability as of September 30, 2023 amounted to US\$167,000. The value of the Warrants was estimated using a binomial lattice, under the assumption that once the price per share exceeds the defined mandatory exercise threshold, the Warrants will be exercised immediately.
3. In connection with the August 2023 Private Placement, the Company issued 8,409,735 Units to investors. Each Unit consists of: (i) one (1) common share in the capital of the Company; (ii) one-half of one (1) Class A common share purchase warrant (each whole Class A common share purchase warrant, a "Class A Warrant"); and (iii) one-half of one (1) Class B common share purchase warrant (each whole Class B common share purchase warrant, a "Class B Warrant") (collectively each whole Class A Warrant and each whole Class B Warrant, a "Warrant"). The Warrants were recorded as a derivative financial liability and will be re-measured each reporting date. The derivative financial liability as of September 30, 2023 amounted to US\$1,086,000. The fair value of the derivatives was obtained using a structural approach. This approach is based on the Black Scholes (1973) and Merton (1974) models (hereafter: Black Scholes Merton, or BSM), which imply that all corporate securities may be analyzed as contingent claim on the firm's assets, and therefore, their value may be modeled as financial derivative contracts on the firm.

7. ACCOUNTING STANDARDS ISSUED BUT NOT YET EFFECTIVE

None.

8. FINANCIAL COMMITMENTS

As of September 30, 2023, there is a restricted deposit in the amount of US\$82,000, which has been pledged as security to an Israeli bank to secure a credit line from the bank. In addition, deposits in

Innscan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

the amount of US\$23,000, US\$11,000, US\$17,000 and US\$22,000 were paid to secure rent, car lease, lab rent obligations and tax authority, respectively.

In addition, the Company has research agreements with Yissum. Under these agreements, the Company is committed to pay additional amounts during the term of the agreements, as detailed below:

Business activity	Agreement	Commitment Remaining
LPT	Yissum Research & License Agreement	Agreement concluded. New agreement is currently under negotiation.
Topicals	No signed agreements carrying any financial commitment	N/A

9. OTHER INFORMATION

The following details the Common Shares and warrants outstanding as of the date of this MD&A:

Common Shares – As of November 29, 2023, 268,001,895 Common Shares were issued and outstanding.

Share Purchase Warrants

Investors	Number Of Warrants		Exercise Price	Exercisable at November 29, 2023	Expiry Date
October 2021 Common Warrants	9,679,000		CAD 1.10	9,679,000	October 13, 2026 ⁽¹⁾

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

Notes:

- (1) Each Common Warrant entitles the holder thereof to acquire one Common Share at an exercise price of CAD 1.10 for a period of 60 months following October 13, 2021.
- (2) Each Warrant entitles the holder thereof to acquire one Common Share at an exercise price of CAD 0.31 for a period of two years from February 16, 2023.
- (3) Each Warrant entitles the holder thereof to acquire one Common Share at an exercise price of CAD 0.44 for a period of three years from February 16, 2023.
- (4) Each Warrant entitles the holder thereof to acquire one Common Share at an exercise price of CAD 0.29 for a period of three years from August 3, 2023.
- (5) Each Warrant entitles the holder thereof to acquire one Common Share at an exercise price of CAD 0.4 for a period of five years from August 3, 2023.
- (6) Each First Tranche 2023 Broker Warrant consists of one Broker Unit Share and one-half of one Broker Unit Warrant. Each Broker Unit Warrant will entitle the holder thereof to purchase one Broker Unit Warrant Share at a price of CAD 0.36 for a period of three years from October 12, 2023.
- (7) Each First Tranche October 2023 Warrant entitles the holder thereof to acquire one Common Share at an exercise price of CAD 0.36 for a period of three years from October 12, 2023.
- (8) Each Second Tranche 2023 Broker Warrant consists of one Broker Unit Share and one-half of one Broker Unit Warrant. Each Broker Unit Warrant will entitle the holder thereof to purchase one Broker Unit Warrant Share at a price of CAD 0.36 for a period of three years from October 20, 2023.
- (9) Each Broker Unit is comprised of one common share of the Company and one common share purchase warrant of the Company. Each warrant shall entitle the holder thereof to purchase one Common Share at an exercise price of CAD 0.36 for a period of 36 months from the date of the closing of the Second Tranche.
- (10) Each Second Tranche October 2023 Warrant entitles the holder thereof to acquire one Common Share at an exercise price of CAD 0.36 for a period of three years from October 20, 2023.

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

Incentive Stock Options

The Company has adopted a stock option plan (the “**Plan**”), which is intended to provide an incentive to retain, persons of training, experience, and ability, to attract new employees, officers, directors, consultants and service providers, to encourage the sense of proprietorship of such persons, and to stimulate the active interest of such persons in the development and financial success of the Company by providing them with opportunities to purchase Common shares of the Company pursuant to the Plan.

During the nine months period ended September 30, 2023, the Company recorded share-based compensation expenses in the amount of US\$755,000 which including the issuance of 2,000,000 common shares to a service provider with a fair value of CAD 460 thousand (approximately US\$341,000) and US\$ 414,000 with respect to the issuance of stock options under the Plan compared to US\$833,000 for the nine months period ended September 30, 2022.

SUBSEQUENT EVENTS:

1. On October 12, 2023 the Company closed the first of two tranches (the “First Tranche”) of its Offering of Units of the Company (the “Units”), pursuant to which the Company issued 1,420,200 Units at a price of CAD 0.30 per Unit (the “Offering Price”) for aggregate gross proceeds of CAD426,060 (approximately US\$ 311 thousand). Each Unit is comprised of one common share of the Company (a “Common Share”) and one purchase warrant of the Company (a “Warrant”). Each Warrant shall entitle the holder thereof to purchase one Common Share at an exercise price of CAD 0.36 for a period of 36 months from the closing of the First Tranche. The Offering was led by Research Capital Corporation as sole agent and sole bookrunner (the “Agent”). In addition, the Company issued to the Agent 113,616 non-transferable broker warrants (the “Broker Warrants”) and CAD 34,084.8 (approximately US\$24 thousand) in cash. Each Broker Warrant entitles the holder thereof to purchase one Unit at an exercise price equal to the Offering Price for a period of 36 months following the closing date of the First Tranche.

On October 20, 2023 the Company closed the second and final tranche (the “Second Tranche”) of Offering of Units, pursuant to which the Company issued 4,005,408 Units at the Offering Price for aggregate gross proceeds of CAD1,201,622.40. In total, the Company issued an aggregate of 5,425,608 Units under the Offering for aggregate gross proceeds of CAD1,627,682.40 (approximately US\$1,188 thousand). In addition, the Company issued to the Agent, 61,100 non-transferable broker warrants (the "Broker Warrants"). Each Broker Warrant entitles the holder thereof to purchase one Unit at an exercise price equal to the Offering Price for a period of 36 months following the closing date of the Second Tranche. The Company also paid the Agent a corporate finance advisory fee consisting of 122,500 Units, CAD27,700 (approximately US\$20 thousand) in cash and 92,330 Broker Warrants.

2. After the Balance sheet date, on October 7, 2023, an attack was launched against Israel, which thrust Israel into a state of war (hereinafter: "The state of war"). The Group is continuing with its operations both in Israel and globally, as of the date of issuance of the

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

condensed interim consolidated financial statements the Company, the state of war had no substantial impact on its operations or business results, the Group continue to assess the effects of the state of war on its consolidated financial statements.

3. On November 6, 2023 the Company approved the issuance of an aggregate of 250,000 options to purchase common shares in the capital of the Company (the "Options") to a consultant, under the Company's stock option plan. The Options are exercisable for a price of CAD 0.32 per common share immediately upon grant. The Options expire after five years from the date of issuance.

10. RISKS AND UNCERTAINTIES

Risks Related to our Business and Industry

Going Concern

Since inception, the Company has generated revenues, despite that, the Group expects to continue to finance itself through raising adequate funds in the foreseeable future. During the nine and three months period ended September 30, 2023, the Group incurred a net loss of US\$3,452,000 US\$1,827,000 accordingly, negative cash flow from operations of \$2,593,000 for the nine months period ended September 30, 2023 and generated US\$32,191,000 of accumulated deficit since inception. The Group currently has insufficient cash to fund its operations for the next 12 months. These material uncertainties may cast significant doubt upon the Group's ability to continue as a going concern. In assessing whether the going concern assumption was appropriate, management took into account all relevant information available about the future, which was at least, but not limited to, the twelve months period following September 30, 2023.

The Group is currently implementing various financing strategies, including the following:

- The Group is actively monitoring cash forecasts and managing performance against its forecasts.
- The Group has identified various cost-reduction initiatives
- The Group has a plan in place to issue additional shares under a non-brokered private placement to raise additional proceeds.

The Group believes that based on the financial strength of its existing shareholder base, and previous success in raising capital, any shortfall in its operating plan may be met through one or more of the above strategies.

Regulatory Risks

Successful execution of the Company's strategy is contingent, in part, upon compliance with regulatory requirements enacted by governmental authorities and obtaining all regulatory approvals, where necessary, for the sale of its products, including maintaining and renewing its licenses. The impact of regulations in the jurisdictions where the Company is looking to operate or sell its products, such as the compliance regimes under the Food and Drug Administration, European Medicines Agency, and Health Canada, any delays in obtaining, or failure to obtain

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

regulatory approvals may significantly delay or impact the development of markets, products and sales initiatives and could have a material adverse effect on the business, financial condition and operating results of the Company.

The Company will incur ongoing costs and obligations related to regulatory compliance. Failure to comply with regulations may result in additional costs for corrective measures, penalties or in restrictions on the Company's operations. In addition, changes in regulations, more vigorous enforcement thereof or other unanticipated events could require extensive changes to the Company's operations, increased compliance costs or give rise to material liabilities, which could have a material adverse effect on the business, financial condition and operating results of the Company.

Change in laws, regulations and guidelines

The Company's operations are subject to various laws, regulations and guidelines relating to the manufacture, management, packaging/labelling, advertising, sale, transportation, storage and disposal of pharmaceutical products but also including laws and regulations relating to drug, controlled substances, health and safety, the conduct of operations and the protection of the environment at the territories the Company is looking to be active. While to the knowledge of management, other than routine corrections that may be required by health authorities in the U.S., Canada and European Union from time to time, the Company is currently in compliance with all such laws. Changes to such laws, regulations and guidelines due to matters beyond the control of the Company may cause adverse effects to its operations.

The Company endeavors to comply with all relevant laws, regulations and guidelines in the countries that the Company is looking to be active. To the Company's knowledge, it is complying or is in the process of being assessed for compliance with all such laws, regulations and guidelines as described elsewhere in this MD&A.

Reliance on Key Contracts

The Company is reliant on certain key commercial agreements, including the Yisum research and license agreement, in order to continue operations. These agreements may include options for termination by the other parties if the Company fails to meet certain development milestones, does not commercialize the products within a reasonable timeframe, or fails to file and maintain patents in certain jurisdictions. The loss of any of these key commercial agreements could materially adversely affect the Company's ability to execute its business plan and strategy, and it may not be able to find adequate replacements on a timely basis, or at all.

Medical research of phytocannabinoids

Research in Canada, the U.S. and internationally regarding the medical benefits, viability, safety, efficacy and dosing of cannabis or isolated phytocannabinoids remains in their early stages. There have been relatively few clinical trials on the benefits of cannabis or isolated phytocannabinoids. The statements made in this MD&A concerning the potential medical benefits of cannabinoids are based on published articles and reports with details of research studies and clinical trials, including those shown in the list of third-party studies summarized in the Company's initial public offering (IPO). As a result, the statements made in this MD&A are subject to the experimental parameters,

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

qualifications and limitations in the studies that have been completed.

We rely on management and need additional key personnel to grow our business, and the loss of key employees or inability to hire key personnel could harm our business.

We believe our success has depended, and continues to depend, on the efforts and talents of our management team and employees. Our future success depends on our continuing ability to attract, develop, motivate and retain highly qualified and skilled employees. Qualified individuals are in high demand, and we may incur significant costs to attract and retain them. In addition, the loss of any of our senior management or key employees could materially adversely affect our ability to execute our business plan and strategy, and we may not be able to find adequate replacements on a timely basis, or at all. We do not maintain key person life insurance policies on any of our employees.

Factors which may prevent realization of growth targets

The Company is currently in the expansion stage from early development stage. There is a risk that expansion and development will not be achieved on time, on budget, or at all, as they can be adversely affected by a variety of factors, including some that are discussed elsewhere in these Risks and Uncertainties and the following:

1. failure or delays in obtaining, or conditions imposed by, regulatory approvals;
2. environmental pollution; non-performance by third party contractors; increases in materials or labour costs; construction performance falling below expected levels of output or efficiency;
3. breakdown, aging or failure of equipment or processes;
4. contractor or operator errors;
5. operational inefficiencies;
6. labour disputes, disruptions or declines in productivity; inability to attract sufficient numbers of qualified workers; disruption in the supply of energy and utilities; and
7. major incidents and/or catastrophic events such as fires, explosions, or storms.

As a result, there is a risk that the Company may not have product or sufficient product available to meet the anticipated demand or to meet future demand when it arises.

Additional financing

There is no guarantee that the Company will be able to execute on its strategy. The continued development of the Company may require additional financing. The failure to raise such capital could result in the delay or indefinite postponement of the current business strategy or the Company ceasing to carry on business. There can be no assurance that additional capital or other types of financing will be available if needed or that, if available, the terms of such financing will be favorable to the Company. If additional funds are raised through issuances of equity or convertible debt securities, existing shareholders could suffer significant dilution, and any new equity securities issued could have rights, preferences and privileges superior to those of holders of Common Shares. In addition, from time to time, the Company may enter into transactions to acquire assets or the shares of other companies. These transactions may be financed wholly or partially with debt, which may temporarily increase the Company's debt levels above industry standards. Any debt financing secured in the future could involve restrictive covenants relating to capital raising activities and

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

other financial and operational matters, which may make it more difficult for the Company to obtain additional capital and to pursue business opportunities, including potential acquisitions. Debt financings may contain provisions, which, if breached, may entitle lenders to accelerate repayment of loans and there is no assurance that the Company would be able to repay such loans in such an event or prevent the enforcement of security granted pursuant to such debt financing. The Company may require additional financing to fund its operations to the point where it is generating positive cash flow. Negative cash flow may restrict the Company's ability to pursue its business objectives.

Competition

There is potential that the Company will face intense competition from other companies, some of which can be expected to have more financial resources and manufacturing and marketing experience than the Company. Increased competition by larger and better financed competitors could materially and adversely affect the business, financial condition and results of operations of the Company.

Research and development and product obsolescence

Rapidly changing markets, technology, emerging industry standards and frequent introduction of new products characterize the Company's business. The introduction of new products embodying new technologies, including new manufacturing processes, and the emergence of new industry standards may render the Company's products obsolete, less competitive or less marketable. The process of developing the Company's products is complex and requires significant continuing costs, development efforts and third party commitments. The Company's failure to develop new technologies and products and the obsolescence of existing technologies could adversely affect the business, financial condition and operating results of the Company. The Company may be unable to anticipate changes in its potential customer requirements that could make the Company's existing technology obsolete. The Company's success will depend, in part, on its ability to continue to enhance its existing technologies, develop new technology that addresses the increasing sophistication and varied needs of the market, and respond to technological advances and emerging industry standards and practices on a timely and cost-effective basis. The development of the Company's proprietary technology entails significant technical and business risks. The Company may not be successful in using its new technologies or exploiting its niche markets effectively or adapting its businesses to evolving customer or medical requirements or preferences or emerging industry standards.

Transportation risks

Due to the perishable and premium nature of the Company's products, the Company will depend on fast and efficient third party transportation services to distribute its product. Any prolonged disruption of third party transportation services could have an adverse effect on the financial condition and results of operations of the Company. Rising costs associated with the third party transportation services used by the Company to ship its products may also adversely impact the business of the Company and its ability to operate profitably.

Due to the nature of the Company's products, security of the product during transportation to and from the Company's facilities is of the utmost concern. A breach of security during transport or delivery could have a material and adverse effect on the business, financial condition and operating results of the Company. Any breach of the security measures during transport or delivery, including

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

any failure to comply with recommendations or requirements of Health Canada, could also have an impact on the Company's ability to continue operating under its licenses or the prospect of renewing its licenses.

We may be subject to unfavourable publicity or consumer perception

The Company believes the medical cannabis industry is highly dependent upon consumer perception regarding the safety, efficacy and quality of the medical cannabis produced. Consumer perception of the Company's products can be significantly influenced by scientific research or findings, regulatory investigations, litigation, media attention and other publicity regarding the consumption of medical cannabis products. There can be no assurance that future scientific research, findings, regulatory proceedings, litigation, media attention or other research findings or publicity will be favourable to the medical cannabis market or any particular product, or consistent with earlier publicity. Future research reports, findings, regulatory proceedings, litigation, media attention or other publicity that are perceived as less favourable than, or that question, earlier research reports, findings or publicity could have a material adverse effect on the demand for the Company's products and the business, results of operations, financial condition and cash flows of the Company. The Company's dependence upon consumer perceptions means that adverse scientific research reports, findings, regulatory proceedings, litigation, media attention or other publicity, whether or not accurate or with merit, could have a material adverse effect on the Company, the demand for the Company's products, and the business, results of operations, financial condition and cash flows of the Company. Further, adverse publicity reports or other media attention regarding the safety, efficacy and quality of medical cannabis in general, or the Company's products specifically, or associating the consumption of medical cannabis with illness or other negative effects or events, could have such a material adverse effect. Such adverse publicity reports or other media attention could arise even if the adverse effects associated with such products resulted from consumers' failure to consume such products legally, appropriately or as directed.

Product liability

As a manufacturer and distributor of products designed to be ingested by humans, the Company faces an inherent risk of exposure to product liability claims, regulatory action and litigation if its products are alleged to have caused significant loss or injury. In addition, the manufacture and sale of cannabis products involve the risk of injury to consumers due to tampering by unauthorized third parties or product contamination. Previously unknown adverse reactions resulting from human consumption of cannabis products alone or in combination with other medications or substances could occur. The Company may be subject to various product liability claims, including, among others, that the products produced by the Company caused injury or illness, include inadequate instructions for use or include inadequate warnings concerning possible side effects or interactions with other substances. A product liability claim or regulatory action against the Company could result in increased costs, could adversely affect the Company's reputation with its clients and consumers generally, and could have a material adverse effect on the business, financial condition and operating results of the Company. There can be no assurances that the Company will be able to obtain or maintain product liability insurance on acceptable terms or with adequate coverage against potential liabilities. Such insurance is expensive and may not be available in the future on acceptable terms, or at all. The inability to obtain sufficient insurance coverage on reasonable terms or to otherwise protect against potential product liability claims could prevent or inhibit the commercialization of products.

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

Product recalls

Manufacturers and distributors of products are sometimes subject to the recall or return of their products for a variety of reasons, including product defects, such as contamination, unintended harmful side effects or interactions with other substances, packaging safety and inadequate or inaccurate labeling disclosure. If any of the products produced by the Company are recalled due to an alleged product defect or for any other reason, the Company could be required to incur the unexpected expense of the recall and any legal proceedings that might arise in connection with the recall. The Company may lose a significant amount of sales and may not be able to replace those sales at an acceptable margin or at all. In addition, a product recall may require significant management attention. Although the Company has detailed procedures in place for testing finished products, there can be no assurance that any quality, potency or contamination problems will be detected in time to avoid unforeseen product recalls, regulatory action or lawsuits. Additionally, if one of the products produced by the Company were subject to recall, the image of that product and the Company could be harmed. A recall for any of the foregoing reasons could lead to decreased demand for products produced by the Company and could have a material adverse effect on the results of operations and financial condition of the Company. Additionally, product recalls may lead to increased scrutiny of the operations of the Company by Health Canada or other regulatory agencies, requiring further management attention and potential legal fees and other expenses.

Reliance on key inputs

The Company's business is dependent on a number of key inputs and their related costs including raw materials and supplies related to its growing operations, as well as electricity, water and other local utilities. Any significant interruption or negative change in the availability or economics of the supply chain for key inputs could materially impact the business, financial condition and operating results of the Company. Any inability to secure required supplies and services or to do so on appropriate terms could have a materially adverse impact on the business, financial condition and operating results of the Company.

Dependence on suppliers and skilled labour

The Company is dependent on various suppliers for inputs for its commercial products, in particular, the availability of CBD will vary in various target markets, depending on national regulations and supply levels.

Difficulty to forecast

The Company must rely largely on its own market research to forecast sales as detailed forecasts are not generally obtainable from other sources at this early stage of the cannabis pharmaceutical industry in North America and Europe. A failure in the demand for its products to materialize as a result of competition, technological change or other factors could have a material adverse effect on the business, results of operations and financial condition of the Company.

Operating risk and insurance coverage

The Company has insurance to protect its assets, operations and employees. While the Company believes its insurance coverage addresses all material risks to which it is exposed and is adequate and customary in its current state of operations, such insurance is subject to coverage limits and

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

exclusions and may not be available for the risks and hazards to which the Company is exposed. In addition, no assurance can be given that such insurance will be adequate to cover the Company's liabilities or will be generally available in the future or, if available, that premiums will be commercially justifiable. If the Company were to incur substantial liability and such damages were not covered by insurance or were in excess of policy limits, or if the Company were to incur such liability at a time when it is not able to obtain liability insurance, its business, results of operations and financial condition could be materially adversely affected.

Management of growth

The Company may be subject to growth-related risks, including capacity constraints and pressure on its internal systems and controls. The ability of the Company to manage growth effectively will require it to continue to implement and improve its operational and financial systems and to expand, train and manage its employee base. The inability of the Company to deal with this growth may have a material adverse effect on the Company's business, financial condition, results of operations and prospects.

Conflicts of interest

The Company may be subject to various potential conflicts of interest because of the fact that some of its officers and directors may be engaged in a range of business activities. In addition, the Company's executive officers and directors may devote time to their outside business interests, so long as such activities do not materially or adversely interfere with their duties to the Company. In some cases, the Company's executive officers and directors may have fiduciary obligations associated with these business interests that interfere with their ability to devote time to the Company's business and affairs and that could adversely affect the Company's operations. These business interests could require significant time and attention of the Company's executive officers and directors.

In addition, the Company may also become involved in other transactions which conflict with the interests of its directors and the officers who may from time to time deal with persons, firms, institutions or Companies with which the Company may be dealing, or which may be seeking investments similar to those desired by it. The interests of these persons could conflict with those of the Company. In addition, from time to time, these persons may be competing with the Company for available investment opportunities. Conflicts of interest, if any, will be subject to the procedures and remedies provided under applicable laws. In particular, in the event that such a conflict of interest arises at a meeting of the Company's directors, a director who has such a conflict will abstain from voting for or against the approval of such participation or such terms. In accordance with applicable laws, the directors of the Company are required to act honestly, in good faith and in the best interests of the Company.

We are subject to environmental regulations and risks

The Company's operations are subject to environmental regulation in the various jurisdictions in which it operates. These regulations mandate, among other things, the maintenance of air and water quality standards and land reclamation. They also set forth limitations on the generation, transportation, storage and disposal of solid and hazardous waste. Environmental legislation is evolving in a manner which will require stricter standards and enforcement, increased fines and penalties for non-compliance, more stringent environmental assessments of proposed projects and

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

a heightened degree of responsibility for companies and their officers, directors and employees. There is no assurance that future changes in environmental regulation, if any, will not adversely affect the business, financial condition and operating results of the Company.

Government approvals and permits are current and may in the future be required in connection with the Company's operations. To the extent such approvals are required and not obtained, the Company may be curtailed or prohibited from its proposed production of medical cannabis or from proceeding with the development of its operations as currently proposed.

Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions thereunder, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment, or remedial actions. The Company may be required to compensate those suffering loss or damage by reason of its operations and may have civil or criminal fines or penalties imposed for violations of applicable laws or regulations.

In certain circumstances, the Company's reputation could be damaged

Damage to the Company's reputation can be the result of the actual or perceived occurrence of any number of events, and could include any negative publicity, whether true or not. The increased usage of social media and other web-based tools used to generate, publish and discuss user-generated content and to connect with other users has made it increasingly easier for individuals and groups to communicate and share opinions and views in regard to the Company and its activities, whether true or not. Although the Company believes that it operates in a manner that is respectful to all stakeholders and that it takes care in protecting its image and reputation, the Company does not ultimately have direct control over how it is perceived by others. Reputation loss may result in decreased investor confidence, increased challenges in developing and maintaining community relations and an impediment to the Company's overall ability to advance its projects, thereby having a material adverse impact on financial performance, financial condition, cash flows and growth prospects.

Third party reputational risk

The parties with which the Company does business may perceive that they are exposed to reputational risk as a result of the Company's medical cannabis business activities. This may impact the Company's ability to retain current partners, such as its banking relationship, or source future partners as required for growth or future expansion in Canada or the USA. Failure to establish or maintain business relationships could have a material adverse effect on the Company.

Changes to safety, health and environmental regulations could have a material effect on future operations

Safety, health and environmental legislation affects nearly all aspects of the Company's operations including product development, working conditions, waste disposal and emission controls. Compliance with safety, health and environmental legislation can require significant expenditures and failure to comply with such safety, health and environmental legislation may result in the imposition of fines and penalties, the temporary or permanent suspension of operations, clean-up costs resulting from contaminated properties, damages and the loss of important permits. Exposure to these liabilities arises not only from the Company's existing operations, but from operations that

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

have been closed or sold to third parties. The Company could also be held liable for worker exposure to hazardous substances and for accidents causing injury or death. There can be no assurances that the Company will at all times be in compliance with all safety, health and environmental regulations or that steps to achieve compliance would not materially adversely affect the Company's business.

Safety, health and environmental laws and regulations are evolving in all jurisdictions where the Company has activities. The Company is not able to determine the specific impact that future changes in safety, health and environmental laws and regulations may have on its operations and activities, and its resulting financial position; however, the Company anticipates that capital expenditures and operating expenses will increase in the future as a result of the implementation of new and increasingly stringent safety, health and environmental regulation. Further changes in safety, health and environmental laws, new information on existing safety, health and environmental conditions or other events, including legal proceedings based upon such conditions or an inability to obtain necessary permits, may require increased financial reserves or compliance expenditures or otherwise have a material adverse effect on the Company.

Disruption of Supply Chain

Conditions or events including, but not limited to, those listed below could disrupt the Company's supply chains, interrupt operations at its facilities, increase operating expenses, resulting in loss of sales, delayed performance of contractual obligations or require additional expenditures to be incurred:

- (a) extraordinary weather conditions or natural disasters such as hurricanes, tornadoes, floods, fires, extreme heat, earthquakes, etc.;
- (b) a local, regional, national or international outbreak of a contagious disease, including the Coronavirus, Middle East Respiratory Syndrome, Severe Acute Respiratory Syndrome, H1N1 influenza virus, avian flu, or any other similar illness could result in a general or acute decline in economic activity;
- (c) political instability, social and labour unrest, war or terrorism; and
- (d) interruptions in the availability of basic commercial and social services and infrastructure including power and water shortages, and shipping and freight forwarding services including via air, sea, rail and road.

Information systems security threats

The Company has entered into agreements with third parties for hardware, software, telecommunications and other information technology ("IT") services in connection with its operations. The Company's operations depend, in part, on how well it and its suppliers protect networks, equipment, IT systems and software against damage from a number of threats, including, but not limited to, cable cuts, damage to physical plants, natural disasters, terrorism, fire, power loss, hacking, computer viruses, vandalism and theft. The Company's operations also depend on the timely maintenance, upgrade and replacement of networks, equipment, IT systems and software, as well as pre-emptive expenses to mitigate the risks of failures. Any of these and other events could result in information system failures, delays and/or increase in capital expenses. The failure of information systems or a component of information systems could, depending on the nature of any such failure, adversely impact the Company's reputation and results of operations. The Company has not experienced any material losses to date relating to cyber-attacks or other information security breaches, but there can be no assurance that the Company will not incur such

Innocan Pharma Corporation

Management's Discussion and Analysis

For the three and nine months period ended September 30, 2023

losses in the future. The Company's risk and exposure to these matters cannot be fully mitigated because of, among other things, the evolving nature of these threats. As a result, cyber security and the continued development and enhancement of controls, processes and practices designed to protect systems, computers, software, data and networks from attack, damage or unauthorized access is a priority. As cyber threats continue to evolve, the Company may be required to expend additional resources to continue to modify or enhance protective measures or to investigate and remediate any security vulnerabilities.

Additional Risks

The Company notes that additional risks to the business are outlined in the Company's Annual Information Form for the year ended December 31, 2022, which is available on the Company's profile at www.sedarplus.ca.

Additional Information:

The Company files annual and interim financial reports, Management Discussion and Analysis, Management Information Circulars, and other information with certain Canadian regulatory authorities. Additional information relating to the Company is available at www.sedarplus.ca.
